Education_

University of California San Diego

La Jolla, CA

B.S. in Cognitive Science: Human-Computer Interaction, Minor in Computer Science and Design

Sept. 2018 - June 2022

• **GPA**: 3.5 (Overall), 3.6 (Computer Science Minor)

• Relevant Coursework: Data Structures, Algorithms, Software Engineering, Systems Programming, Database Analytics, Data Science

Skills

Languages JavaScript, HTML/CSS, Python

Tools/Frameworks React.js, Node.js, Express.js, MongoDB, Firebase, VS Code, Git, Figma, Photoshop, Premiere Pro

Certifications CodePath Intermediate Software Engineering (June 2022 - August 2022)

Experience_

Web Developer Intern

La Jolla, CA

Jan.
Developed an intuitive web application that allows ethnographers to create annotations from multiple streams of video data

• Optimized the annotation timeline for space efficiency, enhanced video playback and manipulation features for flexibility of use

Research Assistant Philadelphia, PA

Temple University Human-Computer Interaction Lab

Oct. 2021 - June 2022

Jan. 2022 - June 2022

- Developed a web application that augments digital whiteboards for design workshop participants by providing computational support
- · Researched and prototyped ways of adapting workshop activities based on user progress to assist in their design process using Figma
- · Implemented logging script that captures user activity using JavaScript and records it to Firebase for later analysis

Web Developer Intern

San Diego, CA

Cut & Dry Barbershop

June 2021 - Sept. 2021

- Collaborated with a team of designers and researchers to help a local business revamp their online presence (case study)
- · Achieved a significant increase in online traffic by creating a modern, user-friendly website that met the client's needs and goals

Projects_

Recipeal

View Project

- · Designed and developed a responsive web application that allows users to store and organize their recipes, and search for new ones
- Utilized the SpoonacularAPI to retrieve new recipe data and created styled front-end components to display them

The Weather Center View Project

- Designed and developed a responsive React weather application that provides weather information for cities using the OpenWeatherAPI
- · Built a user-friendly interface using styled front-end components, utilized state and effect hooks to keep track of and fetch weather data

MBot View Project

- Built a multi-purpose discord bot with a currency/experience system, mini-games, and administrative commands using Node.js
- Structured user data using document schemas in MongoDB, hosted on Railway

Leadership Experience _____

Technical Interview Prep Coach

Remote

CodePath Sept. 2022 - Nov. 2022

- · Facilitated technical mock interviews and pair programming of challenging algorithmic problems for a group of students
- Provided personalized feedback on interview techniques and problem-solving strategies, resulting in a significant improvement in students' interview performance

Web Developer / Logistics Committee

La Jolla, CA

ACM Cyber

Sept. 2021 - June 2022

- Implemented the design of the San Diego CTF website based off mockups using Gatsby.js, which would be viewed by 1,000+ contestants
- · Reached out to cybersecurity companies for club sponsorships and distributed prizes for the San Diego CTF competition
